

Protease

Poultry Feed Additive

Description:

The young animal digestive tract development is not perfect, protease secretion level is insufficient, so the protein digestibility in feed is about 80%. Protein in feed, become expansion under the effect of gastric acid, have strong affinity with protease, can by hydrolyze into peptides and free amino acids.

Indications:

- ▶ Enhance the utilization of energy, protein and mineral element.
Reduce phosphorus pollution.
- ▶ The product have very good appearance and of very good free-flowing characteristics.
- ▶ Have very wide range of PH
- ▶ It has very good effect on anti-nutritional factors in soybean meal

Specification:

Protease	Enzymes	Activities, U/kg
	Protease	10,000 u/kg

Dosage & Administration:

Poultry : 75-100 g per ton of feed

Withdrawal time:

Not necessary.

Shelf Life:

24 months.

Packaging:

25 kg bag.

Storage:

Store in a cool and dry place. Protect from light.

Keep out of the reach of children .
