

ZYME Plus

Poultry Feed Additive

Description:

ZYME Plus (Super heat stable granular phytase) were successfully developed by FAC finely animal care. It is widely used in animal feed industry. It has very outstanding heat stability and biological efficiency. It is suitable to use in the feed high temperature pelleting production.

Indications:

- ▶ Reduce the dosage rate of inorganic phosphorus such as DCP or MCP, therefore the product can help to reduce formula cost.
- ▶ Enhance the utilization of energy, protein and mineral element.
- ▶ Reduce phosphorus pollution.
- ▶ The product have very good appearance and of very good free-flowing characteristics.
- ▶ ZYME Plus has very good working efficiency in animal body, because when improving heat stability we did not change the suitable working temperature.
- ▶ Have very wide range of PH

Specification:

ZYMEPlus	Enzymes	Activities, U/kg
	Phytase	10,000 u/kg

Dosage & Administration:

Poultry : 40-60 g per ton of feed

Withdrawal time:

Not necessary.

Shelf Life:

24 months.

Packaging:

25 kg bag.

Storage:

Store in a cool and dry place. Protect from light.

Keep out of the reach of children .
